Categories: Blue Category

Hello Jared and Erin,

Pleasure speaking with you today. I learned a lot about your department, and hope I clearly demonstrated why agencies choose to partner with Veritone.

To recap, Veritone IDentify, helps law enforcement agencies close cases faster by automatically searching a suspect's face across known offender databases to quickly match persons of interest with arrest records.

I've included additional information for you to review with your supervisors as well as with those that oversee the exporting of your datasets. [Click here](#) to view a short video.

I look forward to continuing the conversation on April 11th and moving forward with a free trial for your department.

If you have any questions before then, please feel free to reach out to me.

Thanks,
Aviv
